a passion for healing...

We are passionate about delivering the highest standards of healthcare, be it having the finest doctors, cutting-edge technology, state-of-the-art infrastructure or nursing with a smile. When we are passionate about healing lives that have been entrusted to us, nothing is too big or too small to ignore.
The Largest Private Hospital in Delhi

- 650,000 Square Feet Built-Up Area
- 700 Beds Capacity
- 17 Modular Operation Theaters
- 125 Critical Care Beds
1959

Hospital Society in Delhi in 1959.

B L Kapur to set up a hospital in Delhi. Dr. Kapur responded by

The then Prime Minister of India, Pt. Jawahar Lal Nehru invited Dr. B L Kapur to set up a hospital in Delhi. Dr. Kapur responded by setting up an institution providing primary and secondary care

BLK Super Speciality Hospital was redesigned and expanded to a Multi-Speciality facility with 700 bed capacity including 325 beds dedicated to cardiac care and 17 modular operation theatres, offering state-of-the-art integrated healthcare service to patients.

The Hospital became the youngest in India to achieve the prestigious NABH (National Accreditation Board for Health Care) certification.

In 1956, on the invitation from the then Prime Minister Pt. Jawahar Lal Nehru, Dr. B.L. Kapur initiated the project for setting up a 200 bed hospital in Delhi, which was dedicated to the nation by Pt. Nehru in January 1959.

During the late 1990s, to keep pace with the developments in the medical field, the trustees of the Hospital felt the need to upgrade it to a tertiary care hospital and tied up with Radiant Life Care Private Limited to re-develop and manage the facility.

Today, BLK Super Speciality Hospital (“the Hospital”) is one of the most modern state-of-the-art tertiary care private hospitals in India.

BLK Super Speciality Hospital is being managed by Radiant Life Care Private Limited. Prior to taking over management of the Hospital, Radiant was responsible for financing and re-developing the erstwhile facility.

In order to manage the operations of the Hospital, Radiant has deputed the entire leadership team including the CEO, CFO, Head Medical Services and Heads of Human Resources, Marketing and Administration. In addition, Radiant has been effective in putting in place processes and best-in-class global practices encompassing both clinical and administrative facets of Hospital operations.

Radiant aims at facilitating the ongoing pursuit of excellence at the Hospital by assisting in bringing in not only the best clinical and non-clinical talent but also the ultra-modern equipment and technology enabling delivery of the highest standards of Healthcare.

The Hospital has a team of more than 1500 healthcare providers including over 150 globally renowned super specialists, more than 300 medical experts, dedicated nursing teams and specifically trained paramedical staff. Bigger on continuous training of all the employees, deployment of most modern infrastructure and focus on patient-centric processes across clinical and administrative functions ensure that patients are well taken care of.

BLK Super Speciality Hospital has a unique combination of the best-in-class technology, put to use by the best names in the professional circles to ensure world-class health care to all patients. Spread on five acres of land, with a capacity of 700 beds, BLK Super Speciality Hospital is one of the largest tertiary care private hospitals in the country and has consistently ranked amongst the ‘Top 10 Multi Super Specialty Hospitals’ in Delhi NCR. The outpatient services are spread on two floors with 60 consultation rooms. All ambulatory services have been designed with the intent to create dedicated suites for all specialties, with their interventional services in close vicinity. Therefore, whether it is the proximity of diagnostic services and Blood Bank to the emergency or one of the best Endoscopy suites to ensure timely and efficient services, the infrastructure speaks volumes about BLK’s commitment to PASSION FOR HEALING.

The Hospital has 17 state-of-the-art well equipped modular operation theatres with three stage air filtration and gas scavenging system to ensure patient safety. All the Operation Theatres are fitted with best in class pendants, operating lights, anaesthetic work stations and advanced information management systems.

The Hospital has one of the biggest critical care program in the region with 125 beds in different intensive care units viz Medical, Surgical, Cardiac, Paediatrics, Neurosciences and Organ Transplant. All critical care beds are in the close vicinity of the Operation Theatre complex for easy accessibility and continuity of care. Each Critical Care unit is equipped with high end patient monitoring devices, ventilators and dedicated isolation rooms. Facilities for Haemodialysis, CRRT, SLED, Endoscopy and Bronchoscopy are available 24X7 by the bedside.

Liver and Renal Transplant Centres have been equipped with dedicated ICUs with individual highfidelity, specialized instruments and equipments. Veno-venous bypass system and dedicated anaesthesia equipment.

The Hospital has specialized birthing suites with telemetric fetal monitors to follow the progressions of labour, and also the facility for the family to stay with the patient during the labour. A dedicated operation theatre adjacent to the labour room helps in shortening the response time in case there is a need to conduct the delivery through surgical means.

The Hospital’s advanced Building Management System provides for multi-tiered access control, electronic security systems with integrated CCTV’s operating across the facility and advanced fire management system amongst other utilities. The Hospital is the first in NCR to install and use automatic pneumatic chute system to enhance the efficiency and efficacy of health care delivery.

The whole campus is Wi-Fi enabled, with the vision of the Hospital becoming the first truly paperless healthcare facility in the country. BLK has top of the line Hospital Information System (HIS) which is securely connected across outpatient, inpatient and diagnostic areas. The system has facility for contemporary electronic medical records (EMR) with remote-accessibility enabling ongoing consultation to patients from distance as well.
State-of-the-art equipment:

- **Cyberknife VSI**: BLK recently became the proud home to Cyberknife VSI, Asia Pacific’s first whole body robotic radio-surgery system for treatment of hitherto inoperable tumors.

- **PET CT Scan**: BLK has installed the latest generation PET CT Scan machine to aid accurate diagnostic and treatment of plethora of diseases. This makes BLK the first hospital in Delhi to offer coupled services of PET CT and Cyber-knife.

- **A Trilogy T6 Linear Accelerator with cone beam CT for Radiation Oncology**: Image guided radiotherapy (IGRT), Intensity Modulated Radiotherapy (IMRT) and Gated Radiotherapy.

- **MRI**: The Hospital is equipped with 1.5 Tesla volume MRI. The special feature of the 1.5 Tesla MRI is its ability to generate 3D images, which cuts the acquisition time by half and increases the comfort and convenience for the patients.

- **CT Scan**: 128 Slice volume CT Scan capable of generating high-quality 3D images.

- **Cath Lab**: Flat panel combo Cath. Lab with 3D reconstruction, DSA and Electrophysiological studies.

- **Nuclear Medicine**: The Hospital has a first of its kind dual head Spect CT, with variable angle gamma camera. This enables the doctors to trace physiological pathways early in the disease process in a non-invasive manner.

- **Blood Bank**: A state-of-the-art Blood Bank meeting all standards has been set up with facilities like Apheresis, Blood Component Separation and Stem Cell Harvesting. The Blood Bank is equipped with the NAT (Nucleic Acid Testing) System for the screening of Blood to ensure the safest possible Blood for all its patients. In addition, a Blood Irradiator—another first of its kind in any corporate hospital for specially treated blood for cancer and other subgroup of patients, shall be installed in the current year.

- **Laboratories**: The Hospital has one of the most well-equipped labs in the NCR for entire gamut of diagnostic services in Haematology, Biochemistry, Microbiology, Molecular Biology and Histopathology.

- **Ultrasound**: Ultrasound machines with 3D and 4D imaging and whole body Doppler.

- **Mammography**: Low radiation digital imaging and stereotactic (3D) biopsy system.

- **X-Ray**: High frequency low radiation digital radiography.

- **Bone Mineral Density**: Whole body mineral density scan capable of giving instant reports.

- **Dental Facilities**: BLK has fully integrated and automatic dental chairs complemented by low radiation and high precision digital X-Ray.

- **Endoscopy Suites**: The Hospital has a dedicated endoscopy suite for endoscopic ultrasound and other advanced endoscopic procedures like ERCP, Stenting, UGIE, Colonoscopy etc.

- **Ambulance Services**: The Hospital has a fleet of Ambulances fully equipped with Advanced Life Support System for all kinds of emergencies.

- **Bronchoscopy Suite**: With most modern equipments in safest and convenient environment.
BLK Cancer Centre

BLK Cancer Centre (BLKCC) is the most comprehensive cancer care centre in the entire region with a focus on holistic approach to cancer treatment. With more than 100 dedicated beds, ultra modern equipments and organ-specific specialist teams, the Centre is a preferred choice for comprehensive cancer care.

The Centre uses the latest treatment modalities in management of cancers with chemotherapy, targeted therapies and hormonal therapy. All cases requiring surgery are diagnosed and investigated by surgical teams streamlined into and specializing in organ-specific services viz. Head & Neck Oncology, Breast Oncology, Gynaec-Oncology, GI Oncology, Thoracic Oncology and Paediatric Oncology etc.

BLK Super Speciality Hospital is the proud home to Cyber-knife VSI ® – Asia’s first and world’s seventh installation of its kind. The Cyber-knife VSI is a Whole Body, Robot Guided, Radio-Surgery System which offers the miraculously accurate and precise Radiosurgery for even inoperable tumors - such as tumors in the lung, relatively inaccessible areas of the brain, spine and prostate. The system offers extremely accurate non-invasive and painless treatment to the patients.

In addition, the Centre has installed the latest generation PET CT scan to aid accurate diagnosis and treatment of a multitude of diseases. Besides the Cyber-knife VSI, BLKCC’s Department of Radiotherapy has the latest Trilogy TX Linear Accelerator, offering state-of-the-art IGRT, IMRT, 3D-CRT, Stereotactic RT and High Dose Rate Brachytherapy.

BLK Centre for Bone Marrow Transplant

BLK Centre for Bone Marrow Transplant (BLKBMT) is the largest in India and amongst the biggest in Asia. BLKBMT is a stand-alone dedicated facility, equipped with ultra-modern infrastructure and internationally trained, widely experienced faculty. The Centre is supported by state-of-the-art laboratory services and transfusion services, along with a fully equipped radiation oncology unit with facility for total body irradiation.

The Centre offers both allogenic and autologous transplant using bone marrow, peripheral blood stem cells and cord blood stem cells for various benign and malignant disorders like Thalassemia, Acute/Chronic Leukemia, Various Lymphomas, Multiple Myelomas and Advanced Paediatric Solid Tumors. BLKBMT has to its credit more than 200 transplants within a short span of two years, including India’s first Multiple Donor Transplant.
BLK Centre for Renal Sciences

BLK Centre for Renal Sciences has a dedicated unit with most advanced dialysis machines and offers round-the-clock service with facility for Continuous Renal Replacement Therapy (CRRT) for hemodynamically unstable patients and Continuous Ambulatory Peritoneal Dialysis. Isolation rooms dedicated to Hepatitis B & C patients are up to global standards.

The Department of Urology and Kidney Transplant is equipped with latest diagnostic and therapeutic facilities like Uroflowmetry, Ultrasound, Doppler, Lithotripsy and Holmium Laser, etc. The Department has dedicated suites for endoscopic procedures ensuring quality treatment as well as complete privacy and comfortable surroundings.

Kidney Transplant

The Kidney Transplant program at BLK has become a recognized Centre of excellence in the region in a very short span of time. Our globally renowned faculty has successfully carried out transplants in clinically difficult and extremely complex cases including cadaver transplant, kidney transplant in HIV positive patients and patients with high chances of rejection.

BLK Centre for Digestive & Liver Diseases

The BLK Super Speciality Hospital takes pride in having one of the most advanced Centres for Digestive & Hepatobiliary diseases, Gastro-Enteral Surgery and Minimal Access & Bariatric Surgery in North India. The Centre carries out all major GI, Hepatobiliary procedures and has a very active Bariatric Surgery Program (including endoscopic bariatric surgery). BLK’s Bariatric Surgery Program for weight loss is one of the most successful programs in the country.

The Centre has dedicated Endoscopy suites with contemporary technology, located within its outpatient area along with a 4-bedded Recovery unit, for ease of patient movement. The Centre has a team of highly qualified and trained doctors with decades of experience in the treatment of GI diseases by Medical, Surgical and Combined means.

Liver Transplant

The Liver Transplant and Hepato-Pancreato-Biliary Surgery Department is a state-of-the-art facility with the best equipment and the latest infrastructure. The facility boasts of the best and most well equipped Liver Transplant ICU in the country with a separate ABU for each bed, reducing the risk of infection to the minimum. The team comprises of Surgeons, Gastroenterologists, Intensivists, Anesthetists, Technicians, Counsellors and Specialised Nurses, who have years of experience in the management of Gastrointestinal, Hepatobiliary and Pancreatic diseases.

It is one of the few Centres in the country where deceased donor as well as living donor liver transplantation along with comprehensive treatment for Gastrointestinal, Hepatobiliary and Pancreatic diseases is being offered to patients under one roof. The transplant team is one of the most experienced in the region and has received extensive training in the best centres across the world and has a vast experience in performing and managing liver transplants.
BLK Heart Centre

BLK Heart Centre provides a comprehensive range of diagnostic as well as therapeutic services for patients with Cardio Vascular ailments. The Department provides dedicated round the clock services to all patients with heart ailments. The Centre has received the Prestigious Lumen Global award for the best response in acute heart attacks for its effective practices to treat heart attacks during the Golden Hour, the first hour after onset of a heart attack, during which if the person gets required treatment he can expect near-complete recovery.

The Department has a team of highly experienced and qualified faculty providing 24X7 Interventional Cardiac Services, such as Coronary Angioplasty and Stenting (PCI) and Primary PCI for acute myocardial infarction. The Department routinely performs complex cardiac procedures like Mitral valvesplasty, Permanent Pacemaker Implantation, Cardiac Resynchronisation procedures, AICD (Implanatable Cardioverter-Defibrillance) Implantation and procedures for congenital ailments such as Coarctation of Aorta, Stenting and PDA ligation.

The Centre offers full range of non-invasive and advanced diagnostic services including Ambulatory Blood Pressure Monitoring, HUTE, CTC Coronary Angiography as well as Nuclear Scans for Cardiology.

The Division of Cardio-Thoracic and Vascular Surgery is an established centre for Coronary Bypass Surgery (CABG), Valve Replacement, Valve repair, Aortic root and Aneurysm surgery. BLK is amongst few centres offering Minimal Invasive Bypass surgeries in the region and most cardiac bypasses are total arterial revascularisation, off pump surgeries, making the Centre a par with the best in the world. The Department also offers a complete range of diagnostic and therapeutic options such as Endovascular Revascularization, AV Fistula Construction, DVT Treatment, Peripheral Bypass procedures and Peripheral Angioplasty.

BLK Centre for Neurosciences

BLK Centre for Neurosciences provides comprehensive evaluation and therapeutic services to a wide range of conditions like Stroke, Brain Hemorrhage, Backache, Spinal Disorders, Neuro-Oncology, Epilepsy and other neurological ailments. The department is equipped with advanced neuro-diagnostic services including EEG, EMG, NCV for the evaluation of a multitude of neurological conditions to provide accurate diagnosis and treatment of even the most complex cases.

The advanced neurosurgical centre offers surgical treatment for a wide variety of ailments such as head injury & trauma, brain tumors, hydrocephalus, arterio-venous malformations and aneurysms. The Centre has one of the most experienced teams of interventional neurourologists for immediate and potentially life saving procedures for stroke and other neurological emergencies.

The minimally invasive neuro-spine surgery program is one of the few in the country offering most advanced solutions to the neuro-spine patients. In addition, the Centre offers minimal invasive treatment for disorders like Disc Protrusion, Spinal Tumors, Spinal Fixation and Primary Tumors as well.
The Centre for Orthopaedics and Joint Reconstruction is organized in various sub-specializations for the treatment of disorders of the musculo-skeletal system (muscles, bones & joints). The Hospital offers dedicated services for Trauma and General Orthopaedics, Spine Surgery, Sports Medicine and Joint Reconstruction including Minimally Invasive Surgery (MIS) for Total Knee Replacement, Total Hip Replacement, Hip Resurfacing, Unicondylar (Partial) Knee Replacement as well as Replacement of Shoulder and Elbow joints. The Centre regularly carries out arthroscopic procedures for sports and other injuries, limb-salvage surgeries for Bone Tumors and reconstruction surgeries for deformities. The centre has a dedicated team for the treatment of spinal ailments including Minimal Invasive Spine Surgery (MIS). Mobilization Solutions and Spinal Fusion procedures, delivers cutting edge advanced diagnostic and therapeutic services.

The Centre for Critical Care has one of the biggest Critical Care units in North India with 125 beds dedicated to different specialties viz. Medical, Surgical, Cardiac, Paediatric, Neonatal, Neurosciences and Organ Transplant. All critical care beds are equipped with cutting edge monitoring systems, ventilators, syringe pumps and infusions pumps. Facilities of Haemodialysis, CRRT, SLED, Endoscopy and Bronchoscopy are available by the bedside within the unit. The ICUs are manned round the clock by critical care consultants, dedicated nurses and technicians with specialized training in critical care services.

BLK Centre for Orthopaedics and Joint Reconstruction

BLK Centre for Critical Care

BLK Centre for Plastic, Reconstructive and Aesthetic Surgery

General Surgery

The BLK General Surgery Department has some of the most renowned surgeons in the region. The Hospital is privileged to have consultants with training in laparoscopic surgery from renowned International Institutes & large teaching experience from reputed Government Institutions which are committed to provide ethical and evidence based surgical options to patients. The Department comprises of specialists unit, providing round the clock emergency services & OPD services. The Department is equipped with high definition laparoscopic instruments and provides a wide variety of open and laparoscopic procedures for abdominal surgeries related to gastrointestinal, appendix, spleen & intestines, etc., various types of hernias (inguinal, femoral, umbilical, incisional & hiatal, etc.), and emergency trauma management. Surgeons of salivary glands, thyroid, Adrenal, Breast, endoscopy suites, hydrocele, varicoceles, various uro & urological disorders like Renal Pelvis Prolapse, Piles, Female, Fisting & Perianal Abscesses are also routinely performed.

Ophthalmology

The Department of Ophthalmology at BLK strives to offer the best care to its patients and has been at the forefront of delivering specialized eye care services for various disorders. The department provides comprehensive ophthalmology services in association with Centre For Sight and has in place the most modern equipments. The department extends its services to all ophthalmic modalities including Refractive Procedures (vision correction procedures), Cataract, Glaucoma, Vitreo Retinal services, Uvea, Cornea, Squint, Paediatric Ophthalmology, Neuro-Ophthalmology, Oculoplasty and tumours, Opticals and Vision Aids, Contact Lens and Comprehensive Eye Check-up.

Dental Surgery

The Department of Dental Surgery functions in association with Axiss Dental and offers comprehensive dental services like Dental Implants, all Ceramic Veneers & Crowns, Precious Metal Crowns, Flexible Valplast Dentures, dental sealants, gum treatment, bone grafting, periodontics and prosthodontics.
Obstetrics & Gynaecology including Infertility & Reproductive Medicine (IVF) and Foetal Medicine

The Obstetrics & Gynaecology Department at BLK Super Speciality Hospital is amongst the best in the country with dedicated birthing suites equipped with telemetric foetal monitors to follow the progress of labour and provide a facility for painless delivery. The department has dedicated operating rooms for caesarean section in the same complex.

The department also offers Laparoscopic surgery for removal of tumors and cysts through key-hole incisions including high-end surgical solutions for management of complex disorders like Double Uterus, Intra-uterine Fibroids and Adhesions, without incision or stitches. Super specialists in the field of laparoscopic gynaecology and foetal medicine routinely perform intra-uterine foetal procedures such as Correctional Surgeries and Foetal Reduction.

Having a team of experts that has achieved a success rate of more than 40% and helped couples in realizing their dreams of parenthood, the IVF centre at the Hospital is unique for being the first of its kind in North India and second only in India to have a modular culture lab in accordance with the European Union Tissue and Cell culture directives and European Society of Human Reproduction and Embryology (ESHRE) guidelines. The Hospital aims at providing the most successful, highest quality fertility treatment in a personalized and confidential environment. The Centre is a recognized FOGSI training centre for aspiring IVF practitioners as well.

Paediatrics, Neonatology and Adolescent Medicine

The Department Paediatrics, Neonatology and Adolescent Medicine is one of the most comprehensive Centres for child care in the entire region and provides excellent care in General Paediatrics, Asthma & Allergy, Adolescent Medicine, Child & Adolescent Psychiatry and Psychology, Developmental Paediatrics, Endocrinology, Gastroenterology, Haematology and Oncology.

The Hospital has a dedicated Paediatric Surgery program for a wide range of congenital and acquired conditions requiring surgical intervention.

The eight-bed NICU unit is equipped with high-end monitors, incubators, high frequency ventilators and surfactant therapy to deal with any level of medical complications in the newborn. The Centre also has a 12-bed Paediatric ICU managed by one of the most experienced teams of highly specialized intensivists in the country. Being one of the handful Level III neonatal ICUs, the Unit undertakes transport and care of critically ill children from the neighbouring states for management in BLK Super Speciality Hospital.
Internal Medicine

BLK Department of Internal Medicine provides logical and holistic approach to management of various disorders like diabetes, cardiac conditions, obesity, high blood pressure, and vascular diseases. In addition the Department plays a pivotal role in providing need based care by optimal utilisation of all medical and surgical super specialities in comprehensive management of patients.

Anaesthesiology and Pain Management

The Department of Anaesthesiology and Pain Management at BLK Super Speciality Hospital is equipped with the latest anaesthesia and hemodynamic monitoring systems. It offers expert preoperative evaluation, post-operative care, pain relief for chronic diseases and painless labour. The Department also provides advanced anaesthesiology services for Cardiothoracic and Vascular Surgery, Organ Transplant, Joint Replacement and Oncosurgery.

Emergency Medicine

The Emergency wing at BLK Super Specialty Hospital has separate Triage and Observation areas. This ensures rapid assessment of patients in keeping with global principles of triage and leads to efficient management of critical patients. The Emergency area also includes an Operation Theatre dedicated to emergency procedures and an isolation room for management of infectious patients.

All critical clinical services including CT, Ultrasound, MRI, X-Ray, Blood Bank, Laboratories and Emergency Transportation are located within the wing, in close proximity. The Department is manned round the clock by highly experienced and trained professionals, supported by the entire range of super speciality services including trauma teams, cardiology units and reconstructive and rehabilitative groups with highly skilled technicians and nurses to ensure shortest turn-around time for diagnosis and treatment planning for trauma patients, saving those critical moments which can be life-threatening for patients, if not managed well.

Laboratory Medicine

BLK Super Speciality Hospital is among the few hospitals in the country to have all laboratories accredited by NABL, corroborating the Hospital's stand to provide the most reliable, accurate and advanced diagnostic services to the patients.

The laboratories are equipped with fully automated equipments seamlessly interfaced with hospital information system to provide the unique advantage of access to the laboratory reports from any location within the hospital and secured access to authorized individuals from any remote location. The patients also have the facility to view and download their outpatient laboratory reports with real time online access thus saving time, money and effort for patients and their relatives.

The team consists of consultants of international repute working together with clinicians to provide comprehensive reporting for a wide range of tests. International accreditation and standardization guidelines are followed to deliver quality and accuracy in results. The services include Biochemistry, Microbiology, Hematology, Histopathology, Serology and Immunology among many others.

Transfusion Medicine

The Department of Transfusion Medicine at BLK Super Speciality Hospital has adopted best practices in blood transfusion services. The Department provides safe leuko-depleted, Micro-particle ELISA and CMIA tested blood. The Blood Bank is equipped with Nucleic Acid Testing (NAT) facility ensuring safety of blood meant for transfusions. Blood utilization is optimized by separating Blood into its various components like red cell concentrate, platelet concentrate, cryo-precipitate and fresh frozen plasma. The aim of the department is to promote use of various components to ensure optimum utilisation of blood and also to ensure that the patient receives the safest possible blood by testing for various markers.

Other services offered by the Department include Apheresis, Plasmapheresis, and Leukapheresis & Peripheral Stem Cell Harvest. The Immunohaematology lab is a valuable resource for routine needs.

The Transfusion Department at the Hospital is one of the few transfusion Centres in the country to have received the coveted NABH accreditation from the Quality Council of India as an independent entity.
Interventional Radiology

The Interventional Radiology Department offers a single window for all minimally invasive procedures requiring image guidance. The Department offers all types of vascular and non-vascular interventions and state-of-the-art digital mammography, stereotactic breast biopsy services, high resolution ultrasonography & colour doppler services for breast, infertility and vascular disorders. BLK’s Interventional Radiology department is one of the handful of Centres in the country to provide Advanced Endovascular Procedures.

Radiology and Imaging

The Department of Radiology and Imaging aims to ensure quality reporting and instant availability to patients.
