

Heart of a 30 year old from Jaipur beats in 56 year old man in Delhi

Quick response from highly qualified and trained team of Doctors at BLK Super Speciality Hospital to availability of heart by a Jaipur donor and led to a successful life-saving transplant on a government employee from Kanauni village of Ghaziabad district in Uttar Pradesh.

The 56-year -old patient, was suffering from an incurable condition called dilated cardiomyopathy, he had reached a stage where he could not perform his routine day to day activities without getting breathless and had multiple episodes of sudden loss of consciousness. It was fortunate that he recovered from these episodes of illnesses as any one of these could have been fatal for the patient looking at his precarious clinical condition. On humanitarian grounds, the transplant was conducted without any monetary consideration as the receiver belongs to lower income group. After a successful transplant, the patient is recovering well. He has two sons and two daughters.

Mr Abhay Soi Chairman and Managing Director Radiant Life Care said, "It is very encouraging to note that heart transplant was successfully performed by our experts. Such transplants also create awareness and encourage people to donate organs for saving precious lives.

This heart transplant at BLK Super Speciality Hospital was made possible when a 30-year-old male, a resident of Jaipur, was declared brain dead at SMS Hospital in Jaipur after being met with an accident couple of days back. Kidneys and eyes were transplanted at SMS Hospital, Jaipur. Liver and Heart were sent to Delhi.
