

*I found my answer at BLK...*

As soon as I arrived at BLK,

I met very professional, attentive and caring Doctor Aditya and his team, who after listening to my history, did a couple of examinations and decided that I immediately undergo a Urethraplast procedure.

This was done on ~~Aug~~ 14, 2014, it went very well and I was discharged a week later.

During admission the Care of the entire staff was exemplary. I am doing very fine now and looking forward to fly back home tomorrow. I would highly recommend this Hospital to anyone who has a long standing issue.
