

I found my answer at BLK...

I have been attended very professionally at BLK by both the medical and support staff.

All the doctors displayed high level expertise. The staff in the Radiology Department handled me in a caring manner.

The theatre team was a special one.

They handle the surgery in such a wonderful manner that I turned round stronger than when I started. Post surgery pain handling was superb. The team in the ward was also special. The nursing care was superb! The support staff made of supervisors, kitchen staff and cleaners did a good job.

Long live BLK.
