

I found my answer at BLK...

I am a kidney patient. In January / Feb 2015 my creatinine was between 6-8 and my hemoglobin was reducing day by day and it came down to 6. I contacted BLK Hospital and met Dr Sunil Prakash. I was admitted in BLK Hospital and was done dialysis for 3 days in a week. Dr Sunil Prakash advised me for transplant. My sister agreed to donate her kidney. After a number of tests at BLK Hospital, the transplant was done on 26/10/2015 by Dr Bhatnagar and his team and was discharged on 3/11/2015. Now I.e on 10/12/15, I am feeling perfect. My creatinine is less than 1 and my hemoglobin is 12.7. I am very satisfied with the treatment provided by BLK Hospital specifically
