

I found my answer at BLK...

My Mother Eunice Benjamin Muringo was diagnosed and found with Brain tumour (Meningioma) at her left side. We went to hospitals in our country Tanzania and we were advised to remove the tumour through operation.

We as family decided to do it here in India. I and my relatives we started searching where could be the best for her case.

We search through web-site and we found BLK speciality hospital. with address of Dr. Vikas Gupta. We contacted his office and they were very cooperative to us.

Dr. Gupta advised us to come to India to do the operation. His good office attended us well since we came and he, himself we congratulate him for the surgery which was very successful. We thank God for his cooperation together with his colleagues Dr. Neha and Abhishek.
